2350 Wall Mount

INTRODUCTION

Thank you for your purchase of our Model 2350 Wall Mounted Backstop. To ensure that our equipment will provide years of use to you, we are including this installation, operation, and maintenance guide. This guide will provide information on the proper assembly and installation methods, operating procedures, and preventative maintenance of your wall mounted backstop.

Please do not substitute for factory parts!

Please contact your customer service representative and allow them to determine if substitute parts are acceptable.

It is recommended that an individual who has been properly trained perform assembly and set up of the backstop. No one under the age of 18 should attempt assembly or set up of the unit, unless properly supervised.

To prevent normal wear and tear from shortening the life of the unit, preventative maintenance inspections and repairs should be performed at least once per year. If the units are subject to high or unusual usage, inspections should be scheduled to occur more frequently. If items are found to be nonconforming, replacements can be ordered from the factory or one of our authorized dealers. When contacting Gared Sports or Performance Sports Systems, please have information regarding the dealer/installer who sold the unit, the name of the project, and any applicable warranty information.

NOTICE TO INSTALLERS

The following instructions are meant as a guide only. This guide is intended to assist you with the installation and operation of the Model 2350 Wall Mounted Backstop. Jobsite conditions will be different for each project, and conditions may change during the project. Any suggestions or tips contained herein are for general information, and may not apply to your particular installation.

Please contact Gared/ PSS for additional information if you are unsure how to proceed with the installation at any time, or if jobsite or building conditions change before or during this installation, thus affecting the correct installation of this unit.

It is imperative to inspect all material being used in this installation BEFORE you begin. Confirm that materials and parts received correspond to those listed on the packing list and production drawings. If any materials or parts have been damaged during shipping or are missing as a result of shipping, you must file a freight claim with the delivering freight company. Missing or damaged material must also be noted on the Bill of Lading at the time of delivery.

If materials or parts are determined to be missing due to factory error or oversight, contact Gared/ PSS immediately at 800-325-2682/ 800-848-8034.

Follow all local safety codes and OSHA regulations. Gared/ PSS will not be held liable, in any way, for improper installation or faulty workmanship at the jobsite.

Before proceeding with assembly, **READ ALL INSTRUCTIONS AND ASSEMBLY PROCEDURES**. Make sure all parts have been received and are not damaged.

This backstop has been manufactured in accordance with the specifications provided by the Owner/Architect.

2350 Wall Mount

CAUTIONS AND WARNINGS

Read and understand the following warnings to prevent possible personal injury and potential damage to the equipment during assembly, setup, and operation.

**DANGER**

DO NOT CLIMB ON GOAL, BANKBOARD OR BACKSTOP.

THIS UNIT IS DESIGNED FOR A SPECIFIC OPERATING WEIGHT AND THE ADDED WEIGHT COULD CAUSE DAMAGE AND/OR SERIOUS INJURY TO PERSONNEL.

2036-31-00

**CAUTION**

DO NOT STAND OR SIT ON UNIT DURING OPERATION

126453735

**CAUTION**

ONLY TRAINED AND AUTHORIZED PERSONNEL SHOULD OPERATE THIS EQUIPMENT. OPERATION BY UNTRAINED OR UNAUTHORIZED PERSONNEL MAY RESULT IN DAMAGE TO THE BACKSTOP OR BACKSTOP STRUCTURE AND/OR INJURY TO ANYONE NEAR THE BACKSTOP.

ALWAYS MAKE SURE AREA AROUND AND BELOW THE BACKSTOP IS CLEAR OF PERSONNEL AND OBSTACLES BEFORE OPERATING THE DEVICE.

NEVER STAND DIRECTLY UNDER THE BACKSTOP DURING OPERATION.

OPERATOR MUST KEEP BACKSTOP IN VIEW AT ALL TIMES DURING OPERATION.

KEY SWITCH OR CONTROL PAD MUST BE MOUNTED IN CLEAR VIEW OF THE BACKSTOP.

NEVER LEAVE KEY IN KEY SWITCH UNATTENDED.

NEVER HANG FROM SIDES OR BOTTOM OF BACKSTOP DURING OPERATION OR WHEN BACKSTOP IS IN THE LOWERED POSITION.

CAUTION SHOULD BE EXERCISED AT ALL TIMES WHEN OPERATING THE BACKSTOP.

ALWAYS FOLLOW PROPER SAFETY RULES.

**WARNING**

Failure to follow proper installation procedures can result in damage to goal and possible injury to personnel.
Read and understand all installation instructions before proceeding.

MODEL INFORMATION

MODEL NUMBER DEFINITION

MODEL

- 2300 – 4 point stationary
- 2350 – 3 point stationary
- 2400 – 4 point fold up
- 2500 – 4 point side fold

EXTENSION

- 203 – 2' to 3' (see installation drawings for exceptions)
- 304 – 3' to 4' (see installation drawings for exceptions)
- 406 – 4' to 6' (see installation drawings for exceptions)
- 609 – 6' to 9' (see installation drawings for exceptions)
- 912 – 9' to 12' (see installation drawings for exceptions)

BOARD

- 0 – FAN SHAPED MOUNTING (NARROW FRAME – 35")
- 4 – RECTANGULAR BOARD MOUNTING (WIDE FRAME – 63")

ADJUST-A-GOAL

- A – With Adjust-A-Goal
- Blank – Without Adjust-A-Goal

2350 Wall Mount

TOOLS REQUIRED

Electric Drill
Drill bits – 9/16", 5/8"
Hammer
Wrenches – 1/2", 9/16", 11/16, and 3/4"
Ratchet Wrenches with 1/2", 9/16", 11/16, and 3/4" sockets
File
4' Level
25' Tape measure
Duct Tape
Block of wood (for tapping)
Broom
Shop-Vac
Utility Knife
Extra rope or chain

WOOD PAD INSTALLATION

Instructions for 2350 Stationary Wall Mounts

- 1) Wood pads are provided for use in anchoring the units to the walls.
- 2) Verify all dimensions and locations with the General Contractor using the latest architectural prints before beginning. Also, verify floor thickness if not working over a finished floor.
- 3) Mark the centerline of the unit on the wall utilizing the best method available.
- 4) Mark the centerline of the wood pad. Wood pads for rectangular boards are 72" wide, with predrilled bracket locations spaced 63" center to center. Wood pads for fan shaped boards are 48" wide, with predrilled bracket locations spaced 35" center to center. Anchors should be spaced to allow installation of chain and structure brackets without interference. The recommended layout is to have one anchor on each end of the wood pad (center approximately 1 13/16" from the outer most edge of the wood pad) and two evenly spaced in the center of the wood pad (see figure 1).
- 5) Next mark anchor locations on the wood pad and drill through.
- 6) Use the holes drilled in the wood pad as a template to mark the anchor holes on the wall. Mark and drill the anchor holes in the wall. PSS recommends pads be bolted through the wall with through bolts and anchor plates. When it is not possible to bolt through the wall contact the structural engineer for the building for advice.

Figure 1. Generic Wood pad drawing with recommended anchor locations.

NOTE: Anchor holes must not be drilled in line with each other or existing bracket holes.

- 7) Attach the brackets to the wood pad. Brackets for the chains should be spaced the same as the pipe supports. **NOTE: Attach the quick links and chains to the brackets prior to anchoring the wood pads to the wall.**
- 8) After all brackets are in place, anchor the wood pads in place on the wall, making sure to place the wood pads for chains and supports in the correct locations (per Figure 2 or 2a).

NOTE: Wood pad dimensions for reference only. See production drawing for final A, B, and C dimensions. If production drawing cannot be located please contact factory.

Figure 2a.

UNIT INSTALLATION

- 1) To attach the outer extension tubes to the wall brackets, slide a hex bolt through the predrilled holes and secure with a nylon lock nut. Perform the same operation on the inner extension tubes and board brackets.
- 2) The next step is to place the inner extension tubes into the outer extension tubes.

Steps (4) and (5) apply to installations with an Adjust-a-Goal. Refer to instructions received with AAG. If you did not receive instructions please contact factory. If your installation does not have an Adjust-a-Goal, please skip to step (6).

- 3) The Adjust-a-Goal should be assembled prior to mounting to the extension arms and prior to mounting the board.
- 5) While assembling the AAG on the ground, the support angles and stiffener braces can be installed on the ends of the extension tubes. Utilize eight of the 3/8"-16 x 1 1/4" hex head bolts with washers and whiz-lock nuts to attach the support angles to the end brackets of the extension tubes. Refer to figure 4.
- 6) Connect the chains from the upper wood pad to the support angle, utilizing the quick links provided.
- 7) At this point, it is equally acceptable to attach the board or hoist the adjust-a-goal into place at the end of the extension arms. The wall mount must be supported as this is done. If you are attaching the board, utilize the 3/8"-16 x 1" carriage bolts at the top support angle and the 3/8"-16 x 3.5" carriage bolts at the DME. To attach the adjust-a-goal, please refer to the installation manual for the adjust-a-goal.
- 8) After the board has been secured to the extension tubes, the board can be set to the proper distance from the wall, as specified by the latest architectural drawings.
- 9) To temporarily retain the extension tubes at the proper length, tighten the setscrews provided in the welded on T-nut, see figure 10. At this time, the board should also be squared and leveled.

Figure 10. Close up of mating between inner and outer tubes, showing weld nut.

- 10) To permanently set the length of the extension arms, drill 3/8" holes through the inner tube at the predrilled location on the outer extension arms. Secure the inner tube to the outer tube with the provided hex bolts and lock nuts.
- 11) Retighten the chains.
- 12) To further brace the unit, the strap bracing should be installed on the upper extension arms. To complete this, the #93 clamps with bushings should be attached to the outer extension pipes. On the inner pipes, as close to the outer pipe as possible, attach #92 clamps. Before tightening down the carriage bolts, install the strap bracing on each clamp as shown in figure 11. Secure the two braces together with a hex bolt and lock nut.

Figure 11. Cross bracing example.

- 13) At this point, a stationary unit is completely assembled. Check that all lengths are correct and that the board is true and square. Support on wall mount may be removed.

MAINTENANCE

- 1) General inspection of equipment should be performed when the unit is used to ensure no catastrophic failures have occurred during the course of use between yearly inspections.
- 2) It is recommended that yearly inspections be conducted to determine if any bolts, chain links, or other hardware has become worn or loosened. A sample check sheet has been provided for you in this guide.
- 3) During yearly inspections, all moving parts should be inspected while in operation. Key points to look for include rotation points where bushings contact metal, winches, pulleys and quick links, and the cable. The cable should be carefully inspected for any fraying or degradation of the apparent quality of the cable.
- 4) Any loose bolts or nuts should be tightened.
- 5) Check sliding components (AAG) for wear and lubricate as needed.

2350 Wall Mount

MAINTENANCE CHECK SHEET

Date: _____

Unit: _____
